Q-TRONIC  
Q-MINI

a **true value** for money solution

Accessories:

# „a true value for money solution“ Q-T

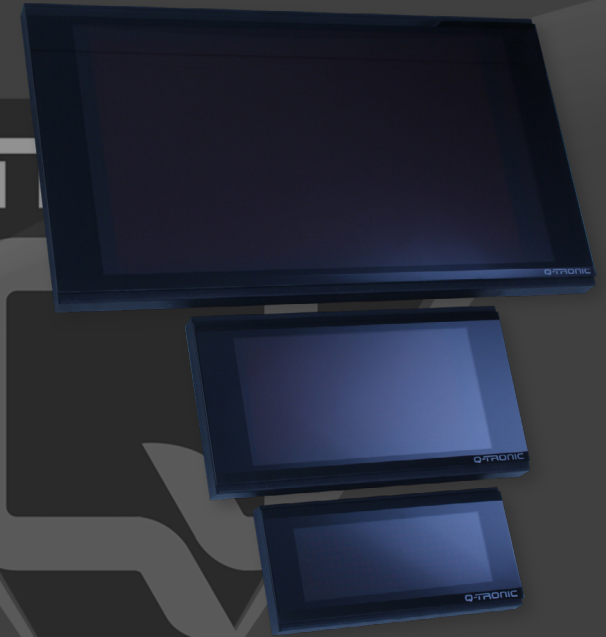

## Overview:

Our engineers have invented the second generation of the Q-MINI! There is a brand new stylish inner and outer architecture and design. With an approach of excellence passion and precision our team design and manufacture Q-MINI.

Our products are invented and manufactured by our workmates with precise and passionate attitude. The cornerstone of our business is to exceed customer expectations with only the most durable and outstanding products. The ten touch button equipped glass surface. The inox cover ensure the elegant appearance of our ticket dispenser. With it's elegant appearance the Q-MINI fits perfectly into any environment. Due to its ease use and comprehensive documentation your personnel will manage the system with both ease and self confidence.

Because of the independent communication network (also available in wireless version) the Q-MINI system can be installed simply in existing client areas.
